Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

o Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

o Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

o Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

#### Item 7.01. Regulation FD Disclosure.

On September 25, 2014, Laredo Petroleum, Inc.'s (the "Company") posted to its website its September/October Corporate Presentation. The presentation is available on the Company's website, www.laredopetro.com, and is attached to this Current Report on Form 8-K as Exhibit 99.1 and incorporated into this Item 7.01 by reference.

All statements in the presentation, including oral statements made during any meeting where the presentation is utilized, other than historical financial information, may be deemed to be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. See the Company's Annual Report on Form 10-K for the year ended December 31, 2013 and the Company's other filings with the SEC for a discussion of other risks and uncertainties. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

In accordance with General Instruction B.2 of Form 8-K, the information in this report (including Exhibit 99.1) is deemed to be "furnished" and shall not be deemed "filed" for the purpose of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section, nor shall such information and Exhibit be deemed incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

#### Item 9.01. Financial Statements and Exhibits.

By:

/s/ Kenneth E. Dornblaser

Kenneth E. Dornblaser Senior Vice President & General Counsel 99.1 Corporate Presentation.

Description

### Forward-Looking / Cautionary Statements

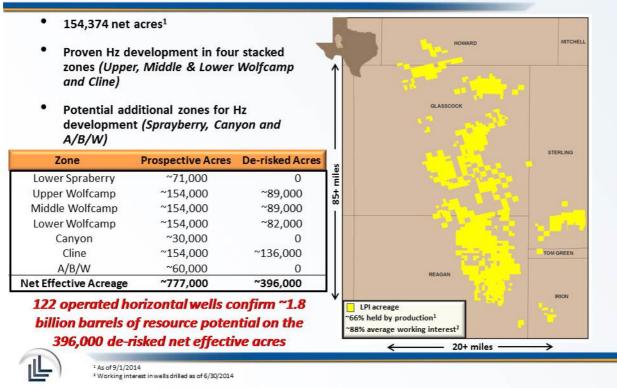

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical fact, included in this presentation that address activities, events or developments that Laredo Petroleum, Inc. (the "Company", "Laredo" or "LPT") assumes, plans, expects, "wavd," "could," or other similar expressions are intended to identify forward-looking statements, which are generally not historical in nature. However, the absence of these words does not mean that the statements are not forward-looking. Without limiting the generality of the foregoing, forward-looking statements contained in this presentation specifically include the expectations of plans, strategies, objectives and anticipated financial and operating results of the Company, including are to the Company's drilling program, production, hedging activities, capital expenditor levels and other factors believe? In the statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond the company, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. These includes, but are not limited to, risk relating to financial performance and results, current conditions, anticipated future developments and other factors believed to be appropriate. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond the forward-looking statements. Current conditions and resulting capital results or differ materially from those implied or expressed by the forward-looking statements. These includes, but are not limited to, risks relating to financial performance and results, current economic conditions and resulting capital restraints, prices and demand for oil and naturalgas, availability of drilling equipment and personal, availability to replace reserves and efficient y develop and exploit its current

Any forward-looking statement speaks only as of the date on which such statement is made and the Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.

The SEC generally permits oil and gas companies, infilings made with the SEC, to disclose proved reserves, which are reserve estimates that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions and certain probable and possible reserves that meet the SEC's definitions for such terms. In this presentation, the Company may use the terms "estimated ultimate recovery", "EUR" or descriptions of volumes of reserves which the SEC guidelines restrict from being included in filings with the SEC without strict compliance with SEC definitions. The Company does not choose to include unproved reserve estimates in its filings with the SEC. Estimated ultimate recovery, refers to the Company's internal estimates of per well hydrocarbon quantities that may be potentially recovered, from a hypothetical and actual well completed in the area. Actual quantities that may be ultimately recovered from the Company's interests are unknown. Factors affecting ultimate recovery include the scope of the Company's songoing drilling program, which will be directly affected by the availability of capital, drilling and production costs, availability of drilling services and equipment, drilling results, lease expiration, transportation constraints, regulatory approvals and development of the Company's core assets provide additional data. In addition, the Company's production forecasts and expectations for future periods are dependent upon many assumptions, including estimates of production decline rates from existing wells and the undertaking and outcome of future drilling activity, which may be affected by significant commodity price declines or drilling activity.

As previously disclosed, on August 1, 2013 (with an economic effective date of April 1, 2013), the Company disposed of its oil and natural gas properties, associated pipeline assets and various other associated property and equipment in the Anadarko Granite Wash, Central Texas Panhandle and the Eastern Anadarko Basin. As a result of such sale, the reserves, cash flows and all other attributes associated with the ownership and operations of these properties have been eliminated from the ongoing operations of the Company, and the information in this presentation has been prepared on such basis.

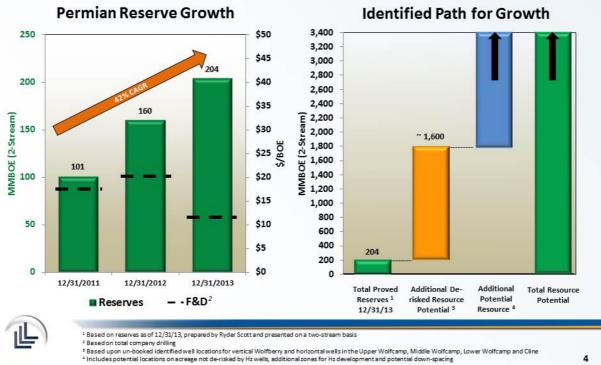

## **Concentrated Asset Portfolio Focused in Midland Basin**

3

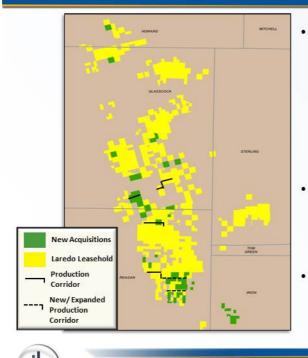

### Permian Reserves<sup>1</sup>

## **Concentrated Multi-Zone Horizontal Development<sup>4</sup>**

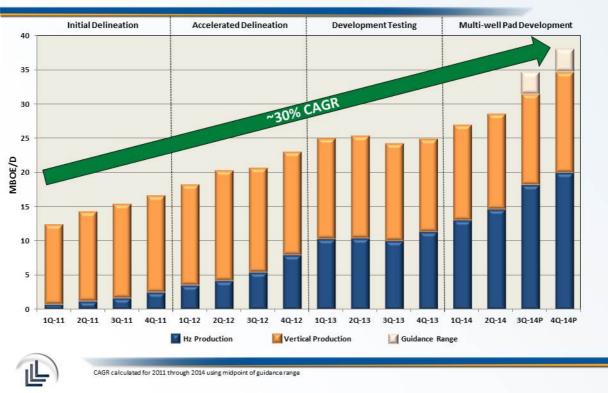

## **Recent Acreage Acquisitions**

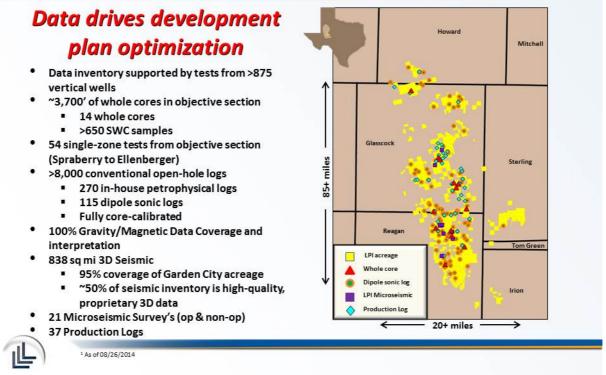

- ~7,700 net acres are contiguous to existing leasehold, with ~6,900 net acres adjacent to full-scale development areas
- Increases working interest in current leasehold
- Facilitates the expansion of a production corridor and the building of a new production corridor that will substantially increase operational efficiency in the area
- Increases the number of higher return long laterals to more efficiently develop the acreage

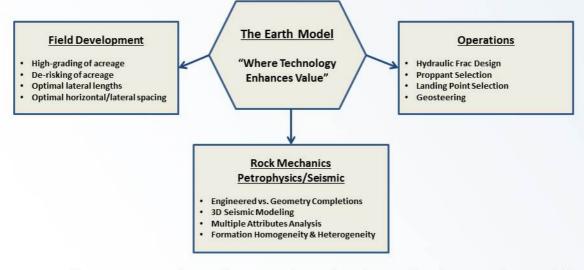

## **Significant Data Confirms Acreage Quality**

10

## **Proven Multi-Zone Horizontal Performance**

### Commercial development has been proven for initial four zones from 122 horizontal wells

Zone		al # of letions <sup>1</sup>	30-Day Avg. IP Rate per 1,000 Lateral Feet		
	Short Lateral	Long Lateral	BOE/D 2-Stream	BOE/D 3-Stream	
Upper Wolfcamp	7	44	96	115	
Middle Wolfcamp	2	18	95	115	
Lower Wolfcamp	0	10	103	121	
Cline	31	10	104	126	

<sup>1</sup> Well completions as of 6/30/14

## **Concentration of Resources Drives Efficiencies**

NYSE: LPI www.laredopetro.com

12

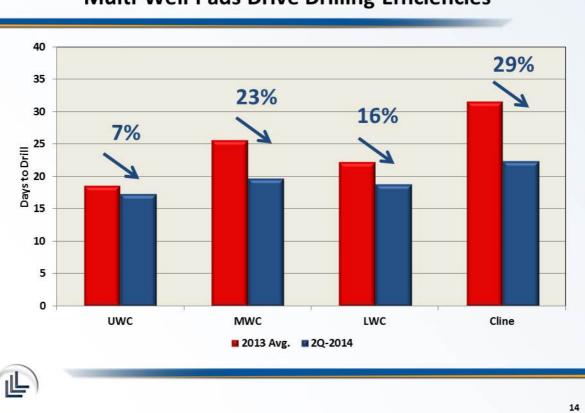

## **Muti-Zone Development**

### Stacked Lateral Development

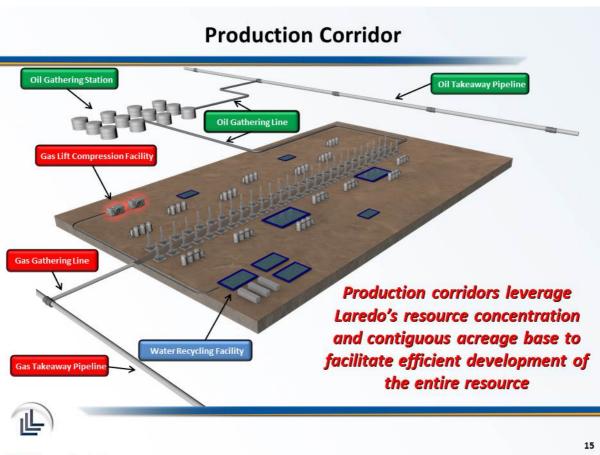

- 2014 program expected to drill ~60 stacked lateral wells utilizing ~20 multi-well pads
- Drilling efficiencies from stacked laterals are driving projected drilling cost reductions of 7% - 25%
- Concentrates drilling to utilize shared facilities and resources

## **Multi-Well Pads Drive Drilling Efficiencies**

## **Production Corridor Benefits**

#### Crude Oil

- · Realized pricing uplift on volumes delivered into gathering system versus trucked volumes
- Sustainable management of lower crude oil inventories
- · Safety and emissions benefits of minimized truck traffic

#### <u>Gas</u>

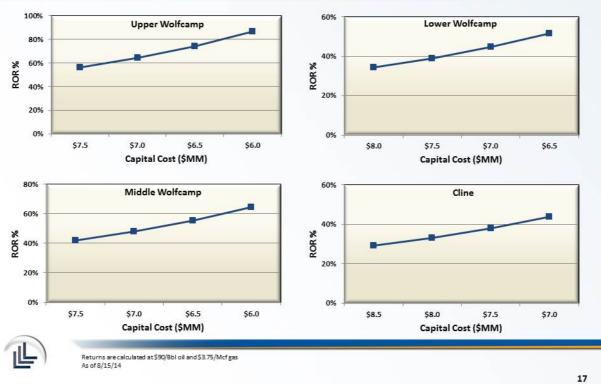

- LOE and capex savings from gathering, centralized gas lift and rig fueling facilities
- Gas gathering to multiple offtake points reduces dependency on individual takeaway providers
- Centralized compression decreases gas lift downtime and reduces production interruptions

#### Water

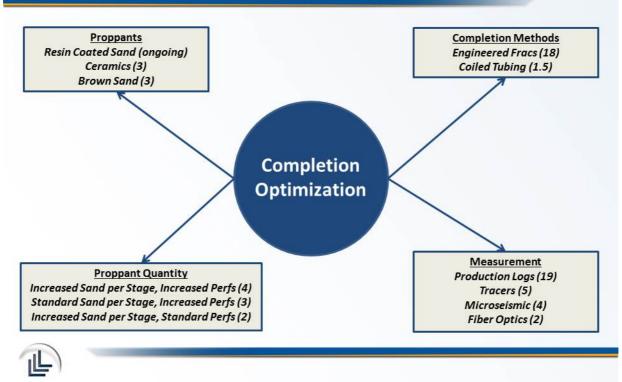

- · LOE and capex savings from fresh, recycled and produced water pipeline systems
- Integrated water system delivers the >1,000,000 barrels of water required for four-stacked completion operations

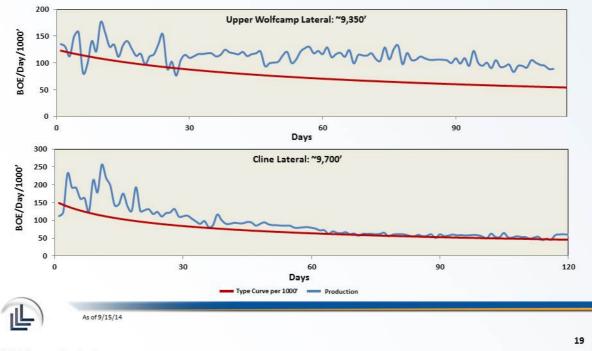

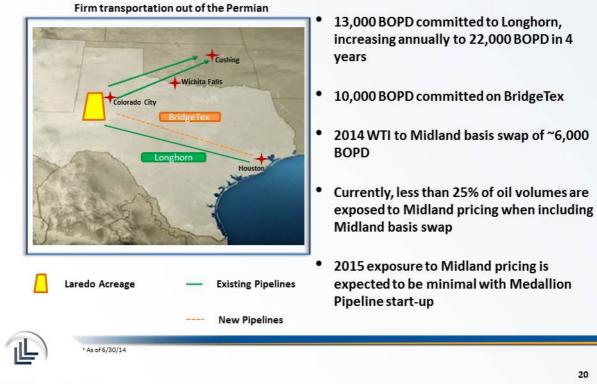

## **Ongoing Completion Optimization**

## Sales Price Diversification<sup>1</sup>

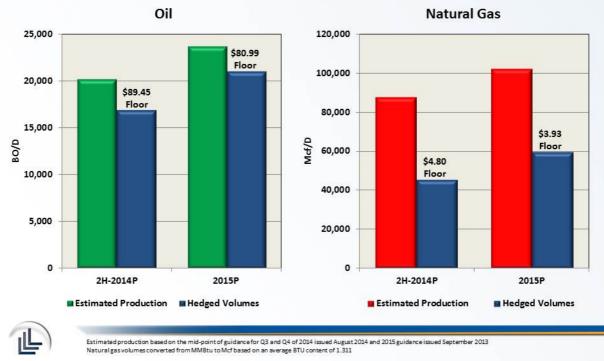

NYSE: LPI www.laredopetro.com

## **Medallion Pipeline**

- Laredo is anchor shipper with committed volumes of 10,000 BOPD increasing to 30,000 BOPD over the next three years
- Provides access to premium pricing in WTI or U.S. Gulf Coast markets (LLS) while avoiding the congested Midland-Colorado City corridor
- Expected to be operational in fourth-quarter 2014 and will minimize Laredo's exposure to Midland pricing in 2015

## **Commodity Hedges**

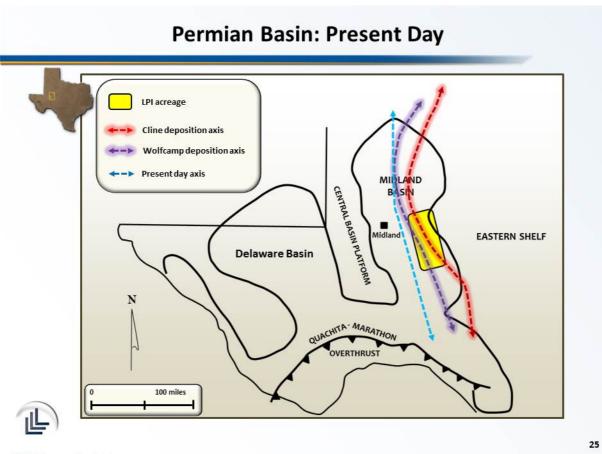

## Laredo Investment Opportunity

- High-quality acreage position in the fairway of the Midland Basin
- Significant resource potential: >8x existing reserves in currently delineated acreage and zones
- Top-tier well results in multiple horizons
- Stacked laterals optimizing multi-zone development manufacturing process
- Solid financial structure
